Free 2-week SMS check-in pilot

- + Up to 10 staff
- + AI-4U included
- + Short report at the end
- + You decide within 7 days

Good morning Maxine

A wellbeing check in on you to see if you are ok?

Reply 'Yes' if you're fine
Reply 'No' if you need support

No

It's a sign of strength to know you need support. Our confidential and professional support will contact you shortly. Always remember, you are never alone.

Illustrative message. Questions and replies are set by you. Every reply is acknowledged.

Pricing (excl GST)

01 UNDERSTAND · ON ITS OWN

Confidential Psychosocial Risk Assessment

\$2,995 excl GST

For shift, site and office teams. Informed by ISO 45003 guidance.

- + Identify pressures: workload, role clarity, relationships and support
- + Use findings to prioritise practical improvements
- + Listen → prioritise → act → review

- + Voice calls available as an optional add-on.
- + CRM

Setup \$995 excl GST, including integration with your communication provider.

Good to know

Check-ins that follow through

Replies are triaged through agreed escalation pathways, and support actions are recorded.

AI-4U support navigation

Confidential navigation to recognised professional support, 24/7.

AI-4U navigates only. It never diagnoses or provides clinical treatment.

Optional extras, on request

Anonymous reporting and Power BI reporting for leaders are not included in the bundle price.

Helps you meet your duty. Our services help you meet your duty under the Health and Safety at Work Act 2015, supporting consultation, risk identification, reporting and follow-up. ISO 45003 is guidance, not legislation.

Clear results. The top areas to act on.

Our confidential psychosocial risk assessment, informed by ISO 45003 guidance, turns staff responses into one simple dashboard for leaders.

Confidential Psychosocial Assessment: clear results and the top areas to act on (example data)

Fictional organisation and figures, for illustration only.

What the dashboard shows

Easy to read

Every category scored from 0 to 100%. Higher % means lower risk, with a simple green, amber and red rating.

Top 3 areas to act on

The lowest-scoring areas, with practical suggested actions, plus the strengths worth protecting.

Privacy first

Results are anonymous and reported in aggregate. Groups under 5 responses are hidden to protect confidentiality.

Then: listen → prioritise → act → review. Agree an action plan, follow up with personalised check-ins and review progress in 6 months.

Supporting your people through emergencies and disruption.

Your business continuity plan covers systems, sites and suppliers. Does it cover your people? Custom SMS check-ins support the people side of your plan, helping you follow up with staff once the immediate response is under way.

How check-ins help

Reach your people fast

Your own customisable questions can reach all your staff with a registered mobile number within minutes.

Every reply is acknowledged

Personalised check-ins with your own customisable questions, helping you make sure no one is overlooked.

Support when it's asked for

Anyone who asks for support is connected with your approved support.

When it helps

Business continuity

Build staff follow-up into your plan alongside systems, sites and suppliers.

Natural events and site incidents

After a flood, storm, earthquake, outage or site incident (when mobile networks are available), follow up with staff across every site and shift.

In the days that follow

People can feel the effects for days or weeks. Follow-up check-ins help you keep support going.

Part of your plan, not your alarm. Custom SMS check-ins support staff wellbeing and follow-up. They don't replace emergency services, lockdown alarms or emergency alerts. It is not an emergency service.

WHAT HAPPENS AFTER SOMEONE REPLIES "NO"

Every reply is triaged. Here is what happens next, step by step.

- 1 Check-in sent**
The business writes its own check-in text and sends it to staff.
- 2 Instant reply and triage**
When someone replies 'No', the system sends a warm reply straight away and flags them for support.
- 3 Professional support notified**
The business's professional support or EAP gets an email with the person's name, mobile number, the question asked and their answer.
- 4 The full story, in confidence**
Support signs in and opens the person's profile to see their history.
- 5 A conversation that captures what matters**
Support records the call in the contact section, with the person's name if they agree or anonymously if not.
- 6 A clear plan**
Support creates a support action with guidance for the person and books a follow-up call.
- 7 No one falls through the cracks**
If a follow-up isn't updated in time, the system escalates and alerts the business admin to assign someone else. The admin is only told the callback is overdue, never the person's details.

50% off year 1 on the 3-year agreement. Offer ends 11:59pm NZDT, Tuesday 15 December 2026.
